

The Institute of Marine Research is one of Europe's largest centres of marine research. We have a staff of around 750 and a wide range of research facilities and laboratories of high international standard. The Institute owns and operates six research vessels. Our main offices are in Bergen, and we have a department in Tromsø and research stations in Matre, Austevoll and Flødevigen.

Post Doctoral position in fish population modelling for Management Strategy Evaluation (Mrk. 38-16)
