CICERO seeks advisor to work on climate finance & green bonds

CICERO is an independent research institute associated with the University of Oslo. CICERO conducts interdisciplinary research on, and provides information and expert advice about, national and international issues related to climate change and climate policy. Climate finance is an expanding field of interest to government and private sector actors. CICERO established the CICERO Climate Finance Center in 2016 to play a bridging role between climate research and the financial sector. CICERO Climate Finance builds on the nexus of climate finance expertise in Norway, extending it to international actors and activities. Our work is advised by the world's biggest investors including NBIM, BlackRock, the World Bank Treasury, and leading green financial actors like AP2, SEB, Storebrand, the Oslo stock exchange and others (see <http://www.cicero.oslo.no/en/cicero-climate-finance>). Since 2007, CICERO has also been the global leading provider of environmental assessments on green bond investment frameworks, or 'Second Opinions' (see www.cicero.oslo.no/greenbonds).

Climate finance advisor position

CICERO's Climate Finance team is working on research projects, applied research, reports and analysis addressing climate risk for the financial sector. The team is seeking an additional staff member with skills and/or education from the finance sector. The team member will work on research projects and develop proposals related to climate finance, and contribute to CICERO's work on Green Bonds including developing the underlying methodology for Second Opinions.

Qualifications include:

- Experience and/or academic background on financial economics, financial instruments
- A broad understanding of key climate change issues and activities
- Analytical and critical thinking
- Good drafting ability in English
- Interest in both theoretical and applied research
- Professional network and ability to meet deadlines

Responsibilities include:

- Contributing to climate finance research projects, applied research, reports and analysis.
- Producing second opinions, including drafting short reports highlighting environmental concerns and reviewing, presenting and discussing reports with both internal colleagues and the external financial community.
- Participating in strategic and methodological discussions regarding CICERO's second opinions and the green bond market.

CICERO offers:

- A competitive salary according to qualifications.
- Working directly with world leading researchers on the most recent developments in the field of climate change
- Pension: The Norwegian Public Service Pension Fund (Statens Pensjonskasse)

For further information please contact:

Research Director Christa Clapp (christa.clapp@cicero.oslo.no), cell phone: + 47 91 39 95 85

The position is initially offered on a temporary contract up to 24 months, starting as soon as possible, with the possibility for a permanent position.

Deadline for applications: November 10, 2017. Please include your CV, application, transcripts and other relevant information/documentation. All applications must be sent in electronically by using www.jobbnorge.no and button: "Søk her" / "Apply for this jobb".
