Doctoral fellowship in International Environment and Development Studies: Global politics of agrarian transformation - Ref.no. 18/01302

The Department of International Environment and Development Studies (Noragric), Faculty of Landscape and Society at the Norwegian University of Life Sciences (NMBU) has a vacant three-year PhD position related to Global politics of agrarian transformation. The selected candidate is expected to commence with the doctoral studies in September 2018.

Faculty of Landscape and Society has 1300 students and 180 staff. It comprises five academic departments, devoted to research and education in the fields of urban and regional planning, property management and law, landscape architecture, international environment and development studies, and public health.

Faculty of Landscape and Society offers two PhD programmes:

- Society, Development and Planning
- International Environment and Development Studies

About the Department and PhD Programme

Noragric is engaged in education, research, institutional collaboration and assignments. With a PhD programme, three Master's programmes and a Bachelor's programme, the Department has 45 scientific staff, 35 doctoral candidates and 450 students.

Research and researcher training pursue high quality, interdisciplinary knowledge in the fields of development, agriculture and food security, natural resources and the environment, governance and international relations, conflicts and human security.

For further information regarding research at the Department, please visit: <http://www.nmbu.no/noragric/>.

Theme of the PhD project

Global politics of agrarian transformation

The Department invites projects that explore the role of actors, power relations and policies in shaping the increasingly globalized politics of agrarian transformation. We call for critical analysis within or across the following thematic foci:

- Power relations in agro-food systems change;
- Technological innovation in relation to alternative agrarian futures; and/or
- Forms of rural agency in the face of agrarian change, such as through farmer organizations, social movements and civic action.

Proposals should aim for a comprehensive and dynamic understanding of the interaction between some or all of the following: actors in farming, government, private sector, civil society and science. They should pursue a global perspective with a grounding in experience from the global South; and employ innovative, interdisciplinary methods, such as but not limited to: ethnographies of organizations and agrarian initiatives; analysis of discourses and narratives; mapping of social agency, networks and impact; or analysis of norms and normative thinking. Projects with a gender-sensitive approach are encouraged. Thus, we invite proposals that can advance global agrarian studies and elucidate contemporary struggles about agrarian transformation and social justice in relation to food, gender, labour and democracy.

Main tasks

The PhD Programme comprises mandatory and elective courses with oral and written examinations and a major research component. The applicant is advised to visit the website for detailed information regarding [PhD regulations](#) at NMBU and information about the [PhD programme at Noragric](#).

The successful candidate will during the first months of the appointment prepare a plan for how to complete a doctorate within the PhD scholarship period of three years. Subject to mutual agreement the contract may be extended to carry out other academic work, primarily in education.

Academic qualifications

Required academic qualifications

- A research-based master's degree (see [PhD regulations § 5.1](#)) in a relevant field with a GPA of B or above
- Proficiency in English as a working language at high academic level

Desired academic qualifications

- International research and/or working experience including in the Global South

Personal skills

Required personal skills

- Ability to plan and carry out independent research of high academic and ethical standard
- Ability to engage in interdisciplinary and collaborative work
- High motivation and ability to create and share knowledge

NMBU offers:

- An academic institution with focus on professional development, dissemination and competence
- An interdisciplinary and inclusive environment that provides exciting research and development opportunities and interaction with students and colleagues
- An attractive campus at Ås
- Possibility of a place in a private kindergarten

Remuneration

Employment as PhD candidate follows national guidelines. The selected candidate will be appointed as a PhD candidate for a period of three years. The salary starts at Norwegian public sector scale level 51 (NOK 443 900 per annum) and follows standard regulations concerning academic merit and promotion. Total additional funding available for running expenses during the PhD studies is NOK 96 000.

Application

To apply for this vacancy, please click '**Apply for this job**' above. This will route you to the University's Web Recruitment System, where you will need to register an account (if you have not already) and log in before completing the online application form.

Applications should include (electronically) a letter of intent, a draft research proposal not exceeding 1000 words, curriculum vitae, full publication list, copies of degree certificates and transcripts of academic records (all certified), and a list of two persons who may act as references (with phone numbers and e-mail addresses). Publications should be included electronically within the application deadline. We may require further documentation, e.g. proof of English proficiency.

Applicants will be evaluated on the basis of their academic qualifications, the quality of the draft research proposal and previous research as well as other relevant experience. The shortlisted applicants will be called for an interview as a part of the evaluation. Applicants invited for an interview are expected to present original diplomas and certificates.

Applicants who lack a master's degree and/or who submit incomplete applications will be excluded from the recruitment process.

Application deadline: 9 April 2018

A compulsory contribution of 2% of the monthly salary is made to the Norwegian Public Service Pension Fund.

A good working environment is characterized by diversity. We encourage qualified candidates to apply, irrespective of gender, physical ability or cultural background. The workplace will, if necessary be facilitated for individuals with disabilities.

In accordance with the Freedom of Information Act § 25, the list of applicants for this position may be made public irrespective of whether the applicant has requested that his/her name be withheld.
