

UNIVERSITETET I OSLO

Jobbnoge ID: 216369
Deadline: 1/21/2022
Website: <http://www.uio.no/>
Scope: Fulltime
Duration: Permanent

Professor or Associate Professor - Pathology

About the position

The Institute of Clinical Medicine, University of Oslo, offers a full (100 %) time position as Professor (position code 1013) or Associate Professor (position code 1011) in Pathology, Department of Pathology, Division of Laboratory Medicine, Institute of Clinical Medicine, University of Oslo combined with a part time position as a (20%) senior consultant position at the Department of Pathology, Division of Laboratory Medicine, Oslo University Hospital.

More about the position

The Department aims to strengthen its position as Norway's leading research environment in Pathology by appointing a person that will front excellent research, participate in supervision and teach medical students. The Department of Pathology is currently organized in seven research groups that integrate university and hospital research activities. Current research topics are within cancer, immunopathology, inflammation and neurodegenerative diseases. The research groups have extensive collaborations with national and international investigators and opportunities to perform translational research are excellent, supported by state-of-the-art core facilities.

According to the regulations at the Faculty of Medicine, the person appointed will lead and initiate research, supervise researchers, participate in teaching students and research fellows and undertake duties in connection with examinations, as well as undertaking administrative tasks as required by the prevailing regulations.

About the University of Oslo

The University of Oslo is Norway's oldest and highest ranked educational and research institution, with 28 000 students and 7000 employees. With its broad range of academic disciplines and internationally recognised research communities, UiO is an important contributor to society.

The Institute of Clinical Medicine (Klinmed) is one of three institutes under the Faculty. Klinmed is responsible for the Faculty's educational and research activities at Oslo University Hospital and Akershus University Hospital. With about 800 employees spread over approximately 425 man-labour years, Klinmed is the university's largest institute. Our activities follow the clinical activity at the hospitals and are spread across a number of geographical areas.
