

# Professor or Associate Professor - Pathology

## Job description

The Institute of Clinical Medicine, University of Oslo, offers a full time position as Professor (SKO 1013) or Associate Professor (SKO 1011) in Pathology combined with a part time position as a (20%) senior consultant position (Pathology) at the Department of Pathology, Division of Laboratory Medicine, Oslo University Hospital.

The Department of Pathology is currently organized in seven research groups that integrate university and hospital research activities. Current research topics are within cancer, immunopathology, inflammation and neurodegenerative diseases. The research groups have extensive collaborations with national and international investigators and opportunities to perform translational research are excellent, supported by state-of-the-art core facilities.

According to the regulations at the Faculty of Medicine, the person appointed will lead and initiate research, supervise researchers, participate in teaching students and research fellows and undertake duties in connection with examinations, as well as undertaking administrative tasks as required by the prevailing regulations.

For complete job description with qualification requirements and basis of evaluation on the academic position please see:

<https://www.med.uio.no/klinmed/om/jobb/stillingsbeskrivelser/2018-13245-stillingsbeskrivelse-patologi.pdf>

## Qualification requirements and personal skills

- The successful applicant is expected to strengthen the research activity in the Department and to contribute actively to collaboration projects.
- Applicants must hold an MD and has sufficient experience in clinical pathology to teach all aspects of both general and organ pathology to medical students.
- The successful applicant should have a strong scientific background and ongoing research activity at a high international level in experimental pathology or pathology-related research.
- She or he is expected to establish a competitive, dynamic and future-oriented research group that will attract PhD students and postdoctoral fellows.
- Applicants should have the ability to create an attractive research environment and to establish national and international research networks as well as obtaining external (including international) research funding are considered essential.
- High ambitions for future research plans and a keen ability to develop the discipline towards novel scientifically-based high standards are expected. A strong commitment to teaching medical students is a requirement, and previous academic teaching experience is desirable.
- Interpersonal skills and the ability to create an attractive research environment, plans for research and ambitions relating to the applicant's personal teaching practice will be emphasized.

More information and weighting of qualifications is found at <https://www.med.uio.no/english/about/vacancies/procedures/>
