Research positions as Postdoctoral Fellow (code 1352)

Research positions as Postdoctoral Fellow (code 1352)

Invitation for excellent scientists to join Centre of Molecular Inflammation Research (CEMIR) at the Norwegian University of Science and Technology (NTNU). CEMIR is seeking outstanding international candidates for positions as Postdoctoral Fellow within the field of molecular inflammation research.

Through our network of national and international collaborations, unique career and cooperation possibilities are offered. The laboratories of CEMIR have state of the art cellular imaging instruments such as: a high resolution STED confocal microscope, total internal reflection fluorescence microscope, live cell- and spinning disk confocal microscopes, image flow cytometer, cell sorter and also a confocal microscope installed in a biosafety level 3 facility. Moreover, CEMIR scientists have access to local core facilities in bioinformatics, genomics, proteomics, imaging and research involving laboratory animals (<http://www.ntnu.edu/dmf/core-facilities>).

Job description

We are searching for candidates with a strong background and interest in applying modern cell and molecular biology techniques including advanced imaging techniques to understand the common underlying mechanisms of inflammatory disorders, and/or to translate such research on human disease models through collaboration with clinical research groups and use of available biobanks.

The positions will be for 2-3 years and in either of five research themes. See <http://www.ntnu.edu/cemir> for detailed information.

Candidates must have

- A PhD degree in cell biology, biochemistry, immunology or medicine.
- A strong experience in cell- and molecular biology techniques.
- Fluent English language skills
- A strong motivation to work as members of a team.
- An independent attitude.

Terms of employment

Depending on qualifications and academic background, Postdoctoral Fellows at the Faculty of Medicine will be remunerated at wage code 1352 - levels 57 to 77 on the Norwegian State salary scale, with gross salary from NOK 482 500,- to NOK 710 100 ,- a year, of which 2% is deducted for the Norwegian Public Service Pension Fund. Normal wage level is 57-60. A yearly amount for operating costs will be added.

The position offers a work with challenging and varied tasks in a versatile and pleasant environment that is characterized by active, committed and skilled employees. NTNU is an equal opportunity employer and candidates are encouraged to apply regardless of age, gender, functional ability or cultural background.

Information and application

Applicants are asked to apply via this page, jobbnorge.no, and to attach all relevant documents, see list below.

The application should contain the following:

- Information about education, examinations, previous experience and motivation for the position.
- CV.
- Short statement on future research ambitions.
- Names and contact details of at least two references.

For information about the positions, please contact CEMIR director Professor Terje Espevik terje.espevik@ntnu.no or Professor Trude Flo trude.flo@ntnu.no.

For information concerning the application process, please contact:

HR-consultant Mariann Hansen, mariann.hansen@ntnu.no, telephone +47 482 80 634

The assessment process will start as soon as applicants register and we will continue to recruit until all positions are filled.

Deadline for applications: January 4th, 2015.
