Associate Professor in Finance

NHH Norwegian School of Economics in Bergen, Norway (www.nhh.no), invites applications for an associate professor position in finance at the [Department of Finance](#). The Department of Finance has four professors, seven associate professors and three assistant Professors. In addition, there are twelve adjunct professors and fourteen PhD students associated with the department. The Department of Finance is involved in teaching and supervision in a variety of NHH's teaching programs, at the Bachelor, Master and PhD levels, as well as several executive programs.

The research at the Department of Finance covers a wide variety of topics within financial economics, including corporate finance transactions, corporate governance, capital structure and investment policies, the pricing of financial contracts, financial institutions and financial stability, and financial market design and trading strategies. The department seeks to strengthen its competency in empirical asset pricing. Central areas are market microstructure and credit and liquidity risk. The department therefore wishes to recruit an associate professor with particular knowledge in these research areas.

The department expects a high level of activity in research and research dissemination. Applicants must possess a PhD in financial economics from a recognized business school/university, and must be able to demonstrate results of high quality in both research and teaching, such as publications in A-level journals. Research quality will be evaluated based on articles published in international journals, presentation of papers at conferences and seminars, working papers and citations.

The candidate appointed to the position can be assigned teaching and supervision duties in all the full-time programs that the department participates in (bachelor, master, PhD). In addition, the department seeks to strengthen its teaching capacity within executive programs. Teaching quality is an important criterion and will be evaluated through documented evidence of previous experience in an academic level of teaching, interaction with students, and student evaluations.

In the assessment of applicants, international experience and involvement in international networks will be emphasized. It is expected that the candidate appointed to the position will contribute to the financial research environment through interaction and cooperation on research with colleagues, attendance at faculty seminars, involvement in recruitment processes, and other activities that aim to strengthen the research and social environment at NHH and the department. In the event of equivalent qualifications, female applicants will be given preference.

The salary will be negotiable within the Norwegian State Salary Scale for associate professors. NHH offers a favorable arrangement with membership in the Norwegian Public Service Pension Fund, generous research funds for traveling and conference participation, and a bonus system for publication in top international journals. The city of Bergen has a mild and costal climate, and offers rich opportunities for culture and outdoor activities (www.visitnorway.com) - as well as a family-friendly environment.

Information about the applicant may be made public even though the applicant has requested not to be named in the list of applicants. The applicant will be notified if his/her request is not respected.

Please include a complete CV, publications, working papers, teaching evaluations, and other documents that are useful in evaluating your application.

The deadline for applications is **5 March 2015**. Enquires about the position should be directed to the Head of Department, Associate Professor Jøril Mæland, e-mail: joril.maeland@nhh.no
