Doctoral research fellow in sensor networks

The "ICT lifestyle and health motivation" project is one of the projects under TTL, and its goal is to give advice on improved lifestyle based on data from sensors that measure relevant health parameters and send them to a central database. Related to this project there is a vacant position for a doctoral research fellow with main research activities in the fields of sensor network, communication protocols and sensor systems. Telenor R&I have a sensor network research group in Tromsø, with which the research fellow will cooperate. The doctoral fellowship is financed by Telenor R&I.

Through our recruitment policy, Telenor wants to ensure diversity in terms of gender, age and culture and encourage women to apply.

Deadline for application is June 15th 2007.

Electronic application and CV should be send via the link «Apply for this job».

Attachments over 5 Mb can not be attached electronically and must be sent by mail.

You can translate this website to English using the link «English» in the top right menu.
